Philosophy of Interdisciplinarity

Studies in Science, Society and Sustainability

Jan Cornelius Schmidt, University of Darmstadt, Germany

Series: History and Philosophy of Technoscience

Interdisciplinarity is a hallmark of contemporary knowledge production. This book introduces a *Philosophy of Interdisciplinarity* at the intersection of science, society, and sustainability. In light of the ambivalence of the technosciences and the challenge of sustainable development in the Anthropocene, this engaged philosophy provides a novel critical perspective on interdisciplinarity in science policy and research practice. It draws upon the original spirit of interdisciplinarity as a concept of environmentalism and offers a critical-reflexive program of interdisciplinarity conducive to a sustainable future for our knowledge society.
